

2017 Cobb Scholars Programs Gets a Boost

The Cobb Scholars Program for 2017 has had tremendous success in partnering with the National Medical Fellowships, the NMA Post Graduate Section, NIH Fellows Program and the SNMA. Cobb is proud to offer complimentary membership to the Cobb Institute for one year to the Members Only Section. This provides the select invitees to:

- An online magazine and subscription to the online Journal of Racial and Ethnic Health Disparities (JHRED), which includes scholarly articles of significance to the medical science community in a wide range of disciplines. The JHRED presents research and reports, and serves as the forum for the membership.
- Invitation to a Cobb Institute Health Disparities Symposium each year with reduced registration fee.
- Members-only access to W. Montague Cobb/NMA Health Institute website.
- Opportunity to access and network with national research scholars and leaders.

as well as preferred VIP status at many of the Cobb receptions during the program year.

The Mentorship & Pipeline Committee of the Cobb Institute, Executive Director Dr. Randall Morgan and the newly elected Chair, Dr. Rodney Hood are thrilled with this new opportunity offering.

Pictured below are just some of this year's new Scholars.
